

Name _____ Date _____ Block _____

BONDING PRACTICE

Complete the 5 steps of bonding for each of the element pairs given below.

Step		
1	Metal or Nonmetal	
	Type of Bonding	
2	Lewis Dot Diagram	
3	Rearrange electrons to make stable atoms. Ionic: arrows transferring e- Covalent: circles around stable atoms.	
4	Draw the molecule showing bonds	
5	Chemical Formula	

Step		
1	Metal or Nonmetal	
	Type of Bonding	
2	Lewis Dot Diagram	
3	Rearrange electrons to make stable atoms. Ionic: arrows transferring e- Covalent: circles around stable atoms.	
4	Draw the molecule showing bonds	
5	Chemical Formula
